- Strengths of Park, I just feel that the school has tried hard to inform and communicate with us all during the pandemic and even now the school has been informing us about everything little by little steps and even using class dojo and tapestry to access home learning. It has eased my tension at times, when my child was starting reception this year that they would ensure that everything is done in the best ways as possible during pandemic and even now making sure all students and parents are always safe and secure and also helping children to continue learning as well as doing every bit as possible for the school to remain open. Me being a parent I am very happy that having such lovely teachers and a support network that builds confidence in my child as well as a better environment to learn in. I am hoping during these tough times it will continue to run smoothly and being less anxious about my child in school during these tough times ahead. The teachers are really being positive and dealing with pupils in such ways that the pandemic isn't in the way. Just want to say thank you :)

The stuff you put on tapestry is amazing. I love the approach you use in teaching the kids. It makes it really easy for the kids. Thanks for your hard work.
